

As the Nazis move slowly and with many reverses towards the Caucasus, it looks more and more as if the sheer pressure of events will strain Turkey's policy of neutrality to the breaking point.

Turkey's strategic location in the steadily expanding war picture is such that Great Britain and Russia and the Axis find Turkey in their focus whenever they consider the shape of things to come in the middle east.

Neutral Turkey at present is a convenient barrier between the Germans and the British. From a German viewpoint it covers the Germans from Anglo-Russian communications thru Iraq and Iran and is a thick padding between the Germans and Syria.

The Turks themselves want to stay out of the war to the last possible moment. They have no sentimental attachments either for Britain or for the Axis. They take a cold, dispassionate view of the war and don't want to back the wrong horse. If they have to back any horse at all, they just want to stay right on the fence at least until they think they know who is going to win the war.

Maintaining, they are expertly withstanding outside pressure of all sorts, maintaining, such impartial neutrality that none of the belligerents can complain.

If the Germans get to the Caucasus, however, all of this may change. The Germans may feel that a neutral Turkey is too much in the way of their German push to Iran and taking up too much room in the picture. The German push toward the Persian Gulf and Suez by way of Iraq, Syria and the Dodecanese.

They may transfer the bulk of their air force from other fronts to the numerous airbases near the Turkish borders to try to browbeat the Turks into siding with them or at least permitting German troops to pass through Turkey—which would be the end of Turkey's neutrality.

Falling persuasion by a show of force, the Germans might invade Turkey, in which case Turkey would resist—at it would resist any Russian or German invasion.

There is always the possibility that the Dardanelles may be Turkish neutrality's stumbling block. The Axis has tried hard to persuade the Turks to allow some of their warships to pass through the straits of the Black Sea where they could make invasion by sea from various parts of the Russian's Black Sea coast likely to succeed.

If the Germans are slowed down, seaborne action against the Caucasus may become imperative, in which case free passage for Axis ships throughout the straits might be considered so vital for the Axis that it would try to seize the straits from the hinterland on the Asiatic side.

There is always the possibility that Turkey would be at war with Germany and a full-fledged ally of Britain.

The American people appear to be under no illusions as to the gravity of the measures recently adopted by the government to further curb the Nazis.

Various organizations and prominent individuals formally endorse the measures already taken and urged even bolder steps.

The influential American Legion has urged repeal of the Neutrality Act and removal from the Selective Service Act of provisions limiting the use

CARBON OLD TIMERS' BANQUET AND DANCE TO BE HELD ON NOV. 13

At a meeting of the Executive committee of the Carbon Old Timers' Association, held on Saturday, October 4, it was decided to hold the annual banquet and dance on Thursday, November 13th.

The following sub-committees were appointed:

Orchestra, C. H. Nash and W. A. Braisher.

Registration, S. N. Wright.

Posters, W. A. Braisher and C. H. Nash.

Entertainment: Meadamer L. Poxon, McKibbin and Torrance.

Point of Program: W. M. Douglas, C. L. Mancell and Jas. Gordon.

Banquet and Lunch: Meadamer Van Luchman and McGough.

Floor Manager: H. M. McNaughton.

It was resolved that those attending the dance must attempt to do the dance called, or resume their seats, and that the Floor Manager may appoint assistants to aid in enforcing this rule.

MANY HUNTERS OUT ON FIRST DAY OF HESANT SEASON

Pheasant season opened south of the Rosebud Creek on Monday, October 13, and hundreds of hunters were out on the hills. While no reports of bag limits are available in the majority of cases, hunters report that pheasants are in some parts of the district. Only cock birds can be shot and the bag limit is three a day and ten for the season, which closes on Saturday, October 18.

of drafted troops to the territory of the United States and its possessions. It is discovered now that the Neutrality Act permits American manned American merchant vessels to carry American munitions to such vital centers of British defense as Hong Kong, Burma and Suez.

The President has already revealed the use to which loan-lend funds already have been put and asked for additional appropriations of \$5,985,000 to aid the countries which are collaborating in the war against the Axis.

No light was thrown this week on the attempts to improve relations between the United States and Japan. The Japanese are steadily extending themselves in the rich and strategic Indo-China but there are no signs of an immediate attack upon that.

Tension appears to be growing between Japan and Russia but there is no sign of change in the fundamentally divergent views of the United States and Japan on problems of the Pacific area.

The Carbon Chronicle invites its readers to listen to the Saturday Night Review, which is broadcast on the Carbon station at 8:15 over CPBN (1290 kc).

CARBON AND DISTRICT NEWS NOTES

A new cement step was put in at the Farmers Exchange store this week and the improvement is a credit to this Carbon store.

The Carbon W. A. will hold a Supper in the Farmers' Exchange Hall, on Saturday, October 18th, at 6:30 p.m. Admission 35c; children 25c.

Dr. A. J. Wright, of Vernon, B. C. visited in Carbon for a few days last week with his parents, Mr. and Mrs. S. N. Wright, stopping in on his way from the Peace River country, where he went on business.

Mrs. Harvey and Christina were in Calgary last Thursday when Wm. Harvey graduated from No. 2 Wireless school.

Rev. and Mrs. F. Alf. left Monday for their new home in Missola, Montana, where Mr. Alf has taken charge of a city church.

Mr. and Mrs. Percy Smith of Calgary spent the week and holiday in Carbon.

The auction sale of effects of the late Chris. Bertsch, held on Tuesday last, proved successful and good prices were received for machinery and the stock.

Bill Boyarchuk has purchased the business of the late Ted Jurkiewicz and will open up a first class harness and shoe repair shop in town, commencing November 1st.

The Freudenbach Baptist church had a farewell program at the Zion station for Rev. F. Alf and family, who have since left for the States. The officials of both churches gave speeches and the Zion Young People rendered special music. A two week's vacation was granted Rev. Alf and he was presented with a Parker Fountain Pen and pencil set. Rev. Alf was presented with a purse of money, and Vernon Alf was the recipient of a Bible from the Zion B.Y.P.U. A fine lunch was served at the close of the gathering.

It has been reported that Ed Martin has secured work in the Drumheller valley and the family will reside there in future.

Mrs. C. Oliphant, Gerry and Patsy of East Coole arrived Saturday and spent the holiday in Carbon with Mrs. E. A. Poxon.

Donna Davidson of the Ghost Pine District is visiting the Rouleau home this week while her mother is in Calgary, where her father W. Smith, has and his farm occupied.

McKibbin's Drug Store One Cent Sale commenced Wednesday and buyers have been flocking in for the bargains.

Stewart Tighe, and Mr. and Mrs. G. Tighe and Bessie of Hildreth were holiday visitors last week end with Mrs. M. J. Elliott.

Cliff Cline returned to Carbon Tuesday from Calgary where he attended the funeral of his mother.

W. HARVEY GRADUATES FROM NO. 2 WIRELESS SCHOOL

Graduation ceremonies were conducted last Thursday afternoon at No. 2 Wireless School, Calgary, when the latest group of wireless air gunners completed their studies. "Bill" Harvey of Carbon was among the graduates and Mrs. Harvey and Christina were in to witness the performance.

Bill left Saturday for Lethbridge where he will take more advanced training.

M.D. CARBON DONATES \$100 TO THE SALVATION ARMY

Mostly routine business was conducted by the Council of the Municipal District of Carbon at their regular meeting on October 7th, when four councillors were present.

Other official re-appointed Deputy Reeve for the balance of the term, and a motion was passed authorizing the secretary to prepare a by-law granting \$100 to the Salvation Army.

The next meeting of the Council will take place on November 4th.

THE WORLD OF WHEAT REVIEWED WEEKLY BY MAJOR H.G.L. STRANGE

During the summer of 1940 the "Crop Testing Plan" analysed just over 15,000 growing samples of wheat and oat samples represented a field of wheat. Approximately 5,000 of these samples were found to classify as Cx or Mixtures, which meant that the farmers growing these fields of Mixtures or of undesirable varieties were losing money because of low yield and poor grade.

The Elevator Agents then endeavored to persuade these farmers to produce their seed, and so to stop losing money.

From reports of the distribution of seed actually made, it is found that the Elevator Agents succeeded in persuading just over 41 percent of those farmers who had Cx and Mixtures to purchase some Registered or Certified seed; those farmers, therefore, who purchased better seed have improved their crops, and so will make more money from their efforts. In addition they have helped to improve the general quality of Canadian wheat offered on world markets.

This work has been going on for 10 years, and each year has shown about the same percentage of improvement. It has been interesting to note that very few of the farmers who were growing poor quality crops were able to utilize the Certified Plant Breeders pointed out the Mixtures and undesirable varieties which their crops contained.

Rev. and Mrs. Frederick Alf announce the marriage of their eldest daughter, Elvora, to Mr. Hal Baker of Portland, Oregon. Miss Alf was employed as book keeper at Portland for the last two years.

HUNTERS SPEND BIG SUMS IN ALBERTA

If they are given the opportunity, tourists will spend big money in Alberta and visit here in still greater numbers.

Recently there were reports of big game hunters arriving in Alberta by aeroplane from the United States, then leaving for the hunting areas by motor car, pack train and other modes of conveyance along the way.

These hunters spent thousands of dollars in Alberta each season. Some of them were a large party consisting of 10 or 12 men and their outfit would average \$50 a day for the expedition.

With Alberta roads in better condition and hard surfaced, so that hunters would be enabled to penetrate to various hunting regions to a greater degree, doubtless a still larger number of ninnows would be attracted to Alberta.

Officials of the Canadian Travel Bureau have emphasized the importance of stressing the game attractions of the Canadian west, particularly hunting and fishing, which are permanent lures for tourists.

When these hunters are eager to come to Alberta, which is known to have some of the finest big game country, every effort should be made to facilitate their entry by motor car or other means. Their expenditures mean a big item each season to business in the provinces of Canada.

CARBON AND DISTRICT NEWS NOTES

Frank Skerry, who has been getting his mail at Walsh, Alberta, has informed the Chronicle to forward his paper to Brooks in future.

The auction sale of C. G. Pernow, held on Tuesday of this week, did not draw an exceptionally large crowd, although fairly good prices were received for the goods and livestock sold.

P. Walter Hirtle arrived in Carbon last week to spend a short leave with his family.

Mrs. Torrance, Mrs. Len Poxon and Mrs. S. N. Wright were Calgary visitors last Wednesday.

Mrs. M. J. Elliott returned home last Tuesday after spending the past few weeks visiting at Hildreth.

Mrs. Jurkiewicz and Cecilia have moved into the house south of the A. Subski residence.

Mr. and Mrs. Jas. Flaws and family and Mr. and Mrs. E. J. Rouleau and family spent the week end visiting in the Beardsley district with Mr. and Mrs. C. S. Sanford.

The Misses Marion and Elaine Torrance of Calgary spent Thanksgiving in Carbon with their parents, Mr. and Mrs. S. N. Wright.

Miss Isabel Goudie, who is attending Normal school, was home for the week end holiday.

Dick Price spent the week end holiday in Calgary.

Mr. and Mrs. Syd Wright and Wray of Calgary were Carbon visitors over the week end.

Eddie Sellen of Medicine Hat arrived in Carbon-Saturday and spent the week end here with his family.

Mr. and Mrs. Bruce Ramsay and sons arrived Saturday from Craigville to visit relatives in town. Mr. Ramsay and Barrie, and Mrs. Nellie Ramsay returned to Craigville Sunday, while Mrs. Bruce Ramsay and Lance are remaining in Carbon for a few days.

Send or bring in any new items that you may know of. The Chronicle is always glad to get local news items and in many cases these are only available from the people involved.

Antelope season opens next Monday and a number of local hunters plan to go south east to hunt these wild animals. Antelope are said to be fairly plentiful in south eastern Alberta and the tag limit is two animals, male or female.

THRESHING AGAIN UNDER WAY AFTER SIX WEEKS' DELAY DUE TO MOISTURE

It has taken nearly seven weeks for the weather to dry up enough to allow harvesting to commence in this district, but the machines are now going night and day and ten days of dry weather will see most of the grain threshed.

Threshing commenced last week for a time the grain was damp but we learn that it is now sufficiently dry to safely permit storage of wheat.

With the general delivery quota of wheat raised to eight bushels per acre farmers will be able to sell their grain to pay their taxes and probably pay a few dollars on the grocery and hardware account, as well as to other immediate creditors.

BILL CAMERON THIRD IN HERALD ROAD RACE

Bill Cameron of Carbon came in at third place in the Herald Road Race, held in Calgary on Thanksgiving day.

The event attracted an entry of 49 athletes and 30 of these finished, the balance dropping out because of the heat.

Kapiste Kerkovius of Scandia was first, time 34 mins., 16.15.

George Robinson of Calgary was second, time 35 mins., 19.15.

William D. Cameron, Carbon, was third, time 35 mins., 28.15.

CANADA YEAR BOOK NOW AVAILABLE TO PUBLIC

The publication of the 1941 edition of the Canada Year Book, published by authorization of the Hon. James A. MacLure, Minister of Trade and Commerce, is announced by the National Bureau of Statistics. The Canada Year Book is a single volume annual of the country, and contains a thoroughly up-to-date account of the natural resources of the Dominion and their development, the history of the country, its institutions, its demography, the different branches of production, trade, transportation, finance, education etc.

In brief, a comprehensive study within the limits of a single volume of the social and economic conditions of the Dominion.

Persons requiring the Year Book may obtain it from the King's Printer, Ottawa, as long as the supply lasts, at the price of \$1.50 per copy; this covers merely the cost of paper, printing and binding. By a special concession, a limited number of paper-bound copies have been set aside for ministers of religion, bona fide students and school teachers, who may obtain such copies at the nominal price of 50 cents each, but application for these special copies should be directed to the Dominion Statistics, Dominion Bureau of Statistics, Ottawa.

THAT'S MY CHEW

Resources Of Our Empire Clearly Shows We Have Essentials For Winning War

(The Financial Post)

We can win this war because we've got what it takes to win—manpower, strategic materials and machinery to convert them.

Germany and her allies had a tremendous start in man, equipment and in the conversion of their resources to a war basis. But we are gaining at an ever accelerating rate.

This is the inescapable conclusion from an exhaustive study made by The Financial Post of available data on both material resources and their utilization.

Here are some facts:

1. \$32 billions of war equipment is to come from the British Empire.

The United States has the most Next year's figure will tower high above that. Germany's own total war expenditure was \$23 billions. No one knows what she can get out of "occupied" Europe and Italy.

2. Germany operates in an "economy of scarcity," being short of such essentials as gasoline, lubricants, many metals, textiles, fats, but she is apparently not yet in an "economy of starvation."

3. Germany has worked wonders with her policy of substitution and use of synthetic products. But it is a costly, wasteful method. Synthetic gasoline costs three times as much as the natural product. Aluminum, when substituted for copper, needs twice as much electric power to make. "Buna," Germany's rubber substitute, needs 30,000 kw. per ton to make; natural rubber none.

The democracies are making enormous speed in turning their aluminum, copper, and steel into ships, tanks and airplanes.

Here are some further facts:

1. The British navy, the United States is now approaching the combined airplane output of Germany, Italy and Europe. A year from now the U.S. schedule calls for 4,000 planes a month, approximately equal to the largest estimates of Axis present output.

2. Air crew training plans of the Empire and the U.S. for current year will turn out at least four times as many trained pilots, navigators, gunners, etc., as Germany can expect.

3. U.S. ship deliveries are just getting under way. In 1942, estimated deliveries will be about six million deadweight tons. At least two million tons—probably much more—will be added to this from Empire sources.

4. Germany and Italy still lead in number of submarines and warplanes in commission.

Have No Illusions

People Of Norway Know Who Is

Their Worst Enemy

This is the text of an appeal being circulated underground by Norwegian patriots. It answers in the following terms both the "quiescent" and Nazi attempts to line up Norway as an ally of Germany against Russia.

"Fetters have declared that there is a widespread desire among us Norwegians to fight the Russians side by side with the Germans.

"We Norwegians have nothing to do with Russia. It is the Germans—not the Russians—who have stolen our country from us. We have therefore not the slightest sympathy for Hitler and his German executioners.

"Fetters' cheerful assumption is that nothing else than a pretext to help Germany mobilize able-bodied Norwegians for the fight which has already cost many German lives, and which has become such a gruesome mass-slaughter that the Germans are not able to bear it alone.

"But not a single one of us will fight for this pretext. We shall all refuse—for our own sakes and for Norway's sake. We shall not offer our blood in order that a tyrant remain in power.

"God save our King and our native land."

Must Surrender Blankets

Norwegian citizens and stores must surrender their wool blankets for use by the German army in accordance with a decree which ordered every one possessing blankets to deliver them immediately. Failure to do so would be punishable by a prison sentence up to three years or by a heavy fine.

Canada's national parks have nearly 700 miles of motor highways and 3,000 miles of trails.

The United States has about 20,000 moving picture theatres.

5. In all other naval vessels the materials of war. Dr. Goebbels, chief Nazi propagandist, speaks of six vital war materials—coal, iron, cotton, copper, oil and rubber.

The British Empire, the United States and Russia are dominant in all of them in the ratio of eight to one. More than this, Britain and her allies have access to additional supplies from unoccupied countries.

Germany is short of four of the items. She has nearly adequate supplies only of coal and iron, thanks to her conquests.

The survey by The Financial Post reveals that the British Empire has an industrial capacity greater than that of Germany and all occupied Europe. The combined industrial capacity of the Commonwealth, United States and Russia is three and a half times as great as that of Hitler's Europe.

Germany faces a 15 million barrel shortage of oil this year.

She has iron and steel, but lacks the metals required to turn them into vital war alloys.

Germany faces a 15 million barrel shortage of oil this year.

Behind the sights of his howitzer, a Canadian artilleryman at an eastern training camp rehearses defensive tactics, in his weird gas-repelling equipment.

People Watch The Bombers

Klaid When They Refuse With No

Gaps In Rank

At vantage points round London people now gather regularly to watch the departure of our bombers en route for Western Germany and Occupied Europe.

There is always great elation when they come back in perfect formation, and corresponding depression when there are gaps in the ranks.

Some times depression turns into joy and relief when two or three lagards are seen bringing up the rear. One of the prettiest sights is to see one of our reconnaissance planes turn aside to greet the bombers. They are streaking up to the formation, dip and return—leaving the onlooker wondering what chery message has been exchanged.

Moon Dead And Dry

Temperatures Vary Sharply And

There Is No Atmosphere

The moon is dead and dry, without wind, water, vapor, clouds, atmosphere or sound. Temperature sky-rocket to approximately 120 degrees C. during the long lunar day, and fall to approximately minus 120 degrees C. during the long lunar night.

These are the reasons why no trace of any kind of life has ever been seen. The moon is only 200,000 miles away.

It has been announced that the whole of the British sugar ration is now produced by British farmers, even been seen. The moon is only 200,000 miles away.

A Real Compliment

School In Republic Of Panama Named

"Dominion Of Canada"

"Believe it or not," there is a school in the Republic of Panama called the "Dominion of Canada." Naming this school is in accordance with a decree issued by the Panamanian government to the effect that each of the public schools of the republic will be named after one of the American or European countries.

The school, "Dominio del Canada," is situated in Santo Domingo, which is one of the largest towns in the Republic of Panama. Santo Domingo is in the interior about 180 miles from Panama city, and is one of the oldest, if not the oldest, settlement on the isthmus.

Most of the old Spanish families in Santo Domingo came from Santiago, Spain. Columbus was Duke of Veraguas, Veraguas being the province of which Santo Domingo is the capital.

On the occasion of the naming of this school in 1930, a feast was declared and elaborate preparations were made to celebrate the event. On this occasion the department of trade and commerce supplied a number of photographs suitably framed and titled, and also a number of maps.

Mr. H. W. Brighton, Canadian trade commissioner at Panama City, has been informed by His Majesty's minister in Panama, that the school proposes to celebrate Canada's national day, July 1, next year.—Dept. of Trade and Commerce.

The Eastern Townships of Quebec have for many years been the most productive asbestos-mining area in the world.

Obscure bare-mining areas are called traps and get along by burning their way; prominent ones are called dictators, and do it by bombing.

In total railway mileage Canada ranks fourth behind the United States, Soviet Russia and India.

Lovely Needlepoint Easily Made

Pattern 6970

This beautiful needlepoint picture done in soft wool goes with Pattern #771, the Malouin picture shown previously. Pattern #6970 contains a transfer pattern of a 9 1/2 x 12 1/2 inch picture; materials needed; color chart. To obtain this pattern and 20 cents in coins (stamps cannot be accepted) to Household Arts Department, Winnipeg, Winnipeg Union, 175 McDermott Avenue E., Winnipeg, Man.

There is no Alice Brooks pattern book published.

Household Arts by Alice Brooks

This Will Be An Heirloom Sacred Heart

The People of Britain Have Found A New Dignity And Courage Nothing Can Crush

Power Passing To Generals

Hitler Still in Charge But Beginning To Suffer Eclipse

John Gordon in the London Sunday Express says:

Have you noticed a curious development in Germany recently? Apart from Hitler and Ribbentrop, you never see a Nazi leader in the picture nowadays. Only the generals, Hitler, and his Foreign Office.

What is happening? I make a guess. Hitler is beginning to suffer the eclipse that comes to all dictators in war. As soon as the armies begin to move, power passes from the dictator to the generals.

Hitler is still powerful, very powerful, but his power is passing before the war.

He may still swoop a general now and again, but when things go wrong he will be left to hold the picture nowadays. Only the generals, Hitler, and his Foreign Office.

We need to watch for it, to beware of the generals of all nations. Our included are like Freemantle. They tend to hang together. Their minds move in the same track. They speak the same language, and they usually comfortably make a deal with each other.

The British generals may not be as Nazi, but it is this war their hands are just as bloodstained as Hitler's. The Führer gave them the opportunity to make what they so nicely named a total war. They took full advantage of it.

And when the time comes to pay the price, we must see that they pay it as well as Hitler's gang. They have no more of this honorable soldierly nonsense.

Both Hitler and his generals are fighting for their lives. They send you hear the drone of motors. They very soon all divided Germany will know it. But trapped beasts often take a lot of killing, and this crew will be as tough as steel.

We seem to be on the eve of new diversions.

Japan, the Hun nation of the Far East, is being pushed in to cause a ramp. Spain is being agitated into a war. The thumb-screws are being put on Turkey.

All these subsidiary volcanoes are being forced into eruption for one purpose and one purpose only—to divert our strength from Europe to the faraway places, to ease the pressure on Germany and to prevent us landing the vital blow.

Finds Them Efficient

Manager Of Toronto Garage Likes Girls For Service Work

"Girls inefficient at servicing cars,"

"That's the reaction of the management of a large downtown Toronto garage to reports from Salt Lake City, Utah, that service station operators are forced to close early because of lack of male help.

Operators there contend women employees can sell gasoline readily enough, but just can't handle the more intricate tasks of changing tires, greasing and repairs.

"We've got four girls washing cars and a fifth in the stockroom who drives a truck for us alone," S. Warrington of the Toronto firm says.

"We couldn't get along without them, we'd have had to close down if they hadn't come to work for us, since there's a shortage of men for such jobs."

The girl we have in the stock department is more efficient than any man," Mr. Warrington added. "She doesn't waste so much time in gossiping."

"These girls are really capable," he said. "They can change tires, grease, wash cars and adjust brakes as well as any man. We think they're great, and our customers tell us it's good to see employees who seem to be enjoying their jobs so much."

William Leslie, in the service department of another large garage, also doesn't agree with the Salt Lake City opinion. He has been in charge of training Red Cross women tire drivers in making running repairs.

"There may be the odd one who isn't mechanically inclined, but most of them are quite capable," he said.

Some airplane propellers rotate in clockwise direction, others counter-clockwise.

The Russian Ukraine has approximately 30,000,000 population.

(John T. Whitaker, in Chicago Daily News)

The people of Britain today know nothing of the soul-searching, indecision and doubt that affects Americans. To them, the Americans have made their peace with England expects that every man will do his duty. It's that simple.

The people with whom I talked have made their peace with death and have forgotten any financial worries for the future. Every one must behave well. Every one does.

My own personal friends, without exception, looked in better health and happier than when I had seen them before the war. People have found a new courage and a new dignity. Nothing can crush that kind of morale.

That morale has convinced the Germans that an invasion of Britain is too big a job for them. It has convinced the Americans that the supplies as far as Iceland and the sink-bats have fallen off abruptly.

The generals of all nations are in a moral. Unless the Germans can stop the supplies and force Washington to recall the warships, the people of Britain can stand anything the Germans bring against them this winter—bombings, gas or invasion.

The British cannot take the offensive now. They are waiting for the supplies to arrive. They are waiting for the supplies to arrive.

Finally there is the promise of the future to be seen in England today. You see the signs of the future. The signs of the future.

The Royal Air Force is on a day-long sweep across the Channel to the sea.

Twice when I watched this scene the people standing in the railway station lifted a cheer, the kind of cheer that comes from the throats of peace-loving but hard-fighting English folk at Blenheim, Trafalgar or Waterloo.

Opinion Of Commodore

Canadians Have Nazi Pliers Beaten Before They Start

"The Canadians think for themselves." That was the opinion given in an interview at Toronto's Air Commodore C. Critchley, Canadian-born chief of the initial training wings in England. He arrived in England a graduate of the Royal Air Force, and he will inspect various training schools of the Commonwealth Air Training Plan at the invitation of the R.C.A.F.

"I know my Canadians pretty well and I know where the Canadian fighters should be," Air Commodore Critchley said. "No Hun in the world can touch a well-equipped Canadian division on an even footing. The Canadian pilot has the Hun beat a mile before he starts."

Air Commodore Critchley, born in Calgary, said "I believe the war will be over and the Hun defeated within four years. The longer America takes back, the longer it's going to last of course."

Obeded The Rules

Followed Health Regime Only To Meet Unlikely End

He brushed his teeth twice a day with a nationally advertised tooth brush.

The doctor examined him twice a year.

He slept with the windows open.

He stuck to a diet with plenty of fresh vegetables.

He relinquished his tennis and other four-worm-out glands.

He got, but never more than 14 hours of sleep.

He never smoked, drank, or lost his temper.

He did his daily dawn daily.

He got at least eight hours sleep each night.

The funeral will be held Wednesday. He is survived by 15 specialists, four health officials, six grandsons and numerous manufacturers of health foods and antiseptics.

He had forgotten about related to grade counsellors—Peterborough Examiner.

Roll 'em with Ogden's!

Ask any real roll-your-own owner about Ogden's. He'll tell you he has been smoking it for twenty years or more. Why? Because it's not just another tobacco — it's Ogden's. And Ogden's has a taste all its own, a taste which comes from its distinctive blend of choice tobacco. Take a tip from old timers and roll 'em with Ogden's.

Only the best cigarette papers — Ogden's — are good enough for Ogden's.

Had Spectacular Reign

Former Shah of Iran Was Victorious Man Of Action

Reza Shah Pahlavi is no longer Shah-in-Shah of Iran, having abdicated in favor of his 21-year-old son, Mohammed Reza Pahlavi. Thus, says the Hamilton Spectator, comes to an end a spectacular reign of 16 years, worthy to take its place in the annals of the Arabian Nights. The career of Reza Shah and his rise to supreme power, is, indeed, well-nigh incredible. It is said he owes his good fortune to Lord Trenchard, who picked out the tall Persian officer, who had given good evidence of his courage and enterprise, to take command during the anti-Bolshevik operations following the last Great War. Colonel Reza Khan, as he then was, lost no time in improving the occasion, riding into Teheran with his Cossacks, in 1921, and setting himself up as the new ruler of Persia.

That this vigorous man of action was a great improvement over the weak, pleasure-loving voluptuary Ahmed, his predecessor, who spent so much of his time in the French Riviera, is undisputed. The reformer Reza Khan effected in Persia, which he renamed Iran, were many and real. Conditions were no longer such that there was practically unlimited scope for the exercise of his energy and zeal. But in bringing about the changes much hardship and injustice is said to have been inflicted on officials and people alike.

Complete Literature

Given To World By Ancient Greece, Modern France And England

There are few nations who have during the whole existence really thought and read. Among the Ancients the Latin literature is worth nothing at the outset, then it borrowed and became imitative. Among the moderns, Greek literature does not exist for nearly two centuries (1500-1750). Italian literature and Spanish literature end at the middle of the seventeenth century. Only ancient Greece, Modern France and England offer a grand and complete literature.

HOME SERVICE

LETTER MAY DECIDE FATE OF YOUR ROMANCE OR JOB

Her Note Needs A Few Tips

How quickly you can kill a number romance with a boring letter. And yet good letters are as easy to write as bad ones.

Ever feel it's hard, dull work to grind out "Dear Bill, How are you? I am writing to say..." But it's a trick to scrawl your gay, natural greeting. "Hi, Bill."

And why waste words "writing to say"? Just SAY! At once Bill recognizes the real, attractive you he knows. He loves your characteristic description of the jalopy that "the glori-ous purple sunset at Clear Lake."

It's the same in business letters. You don't hem and haw. "In reply to your letter..." You write directly. The salary you mentioned will be satisfactory.

That positive note is important in closing, too. Not "Regretting the delay, we are..." We will see that such a delay does not occur again. Sincerely yours...

NEW LONG-WAISTED HOME-FROCK

By Anne Adams

When Jesus was about to pass through Jericho on his way up to Jerusalem, Zachaeus, a publican, was about to climb for it had a short trunk and wide-spreading branches. The sycamore of Palestine is not like the sycamore of England, which is described as a fig-milky because it has a milky juice in its leaves and it leaves those of the mulberry.

When Jesus reached the tree he looked up and calling Zachaeus by name he said to him, "Come down, for I must abide at thy house," he added.

No Jewish rabbi would care for him to stay at a publican's house, but Jesus' was that of a shepherd who would care for his lost sheep.

Zachaeus dropped down from the top of the tree and came down home with Jesus while the people murmured saying, "He is going to lodge with a man who is a sinner."

"Publicans and sinners" was a phrase in common use.

"When Jesus declared that he had come to lay down his life a ransom for many, and in that order that everyone might understand in his sense the ransom of his life, he took the salvation of Zachaeus as an illustration of the understanding of the atonement" (John Watson).

An Incident in History

Nazi Successes Do Not Mean That

Frederick Is Last

Douglas Miller in the Atlantic Monthly says: Germany can be beaten. It is treason inside the country to say so, but every German thinks that it worries about it and is preparing himself psychologically to accept it. Germany will be beaten. The long story of humanity's rise toward a tolerable and free existence for the average man will not be lost and because of the insane delusions of a single individual or the wounded inferiority complexes of a single people German military successes in the last two years are based upon a superior mechanized army, organized and equipped while the Democracies sleep. This is merely an incident in history. It is not the end of Christian civilization, or of human decency, or of freedom.

Should Be Permanent

One of our oldest and most time-honored customs, that of throwing rice and confetti on newly-married couples, is being abolished by law in Britain. The shortage of foods and feeds, and of paper stocks, has forced the move. It is one war regulation which should not be hard to obey.

Why Japan Hesitates

Mahogany comes from the mahogany tree of tropical America.

SUNDAY SCHOOL LESSON

OCTOBER 12

CHRIST OUR SAVIOR

Golden text: For God so loved the world, that he gave his only begotten Son, that whosoever believeth on him should not perish, but have eternal life. John 3:16.

Lesson: Matthew 1:21; 20:28-29; Luke 19:1-10; John 3:16; 6:6-9; Acts 4:12; Romans 3:23-25; 8:31-39; 11: Corinthians 5:14-21; Philippians 2:1; Timothy 1:13.

Devotional reading: Isaiah 53:1-6.

Explanations and Comments

The Savior Came to Give His Life a Ransom for Many, Matthew 20:28-29.

Matthew 20:28-29. Jesus said to his disciples in this chapter. Calling the disciples to him, Jesus reminded them of the way the rulers of the Gentiles played the tyrant over them, their great ones exercised authority over them. That is the worldly idea of greatness—power to exercise authority, high position which can demand service, influence, obedience, exact signs of homage.

"Not so shall it be among you," Jesus continued; among you the servant must be first. You are measured, not by the way you lord it over others, but by the way you serve others. Greatest among you is the one who is least useful to his fellow men. Even as the Son of man came not to be ministered unto, but to minister, and to give his life a ransom for many. This is the first meaning of Christ's death—his self-sacrifice for others.

Christ's Death a Ransom for Many, Luke 19:1-10. Zachaeus was a publican of Jericho, a collector of taxes who was rich and dishonest with ill-gotten gains.

When Jesus was about to pass through Jericho on his way up to Jerusalem, Zachaeus, a publican, was about to climb for it had a short trunk and wide-spreading branches. The sycamore of Palestine is not like the sycamore of England, which is described as a fig-milky because it has a milky juice in its leaves and it leaves those of the mulberry.

When Jesus reached the tree he looked up and calling Zachaeus by name he said to him, "Come down, for I must abide at thy house," he added.

No Jewish rabbi would care for him to stay at a publican's house, but Jesus' was that of a shepherd who would care for his lost sheep.

Zachaeus dropped down from the top of the tree and came down home with Jesus while the people murmured saying, "He is going to lodge with a man who is a sinner."

"Publicans and sinners" was a phrase in common use.

"When Jesus declared that he had come to lay down his life a ransom for many, and in that order that everyone might understand in his sense the ransom of his life, he took the salvation of Zachaeus as an illustration of the understanding of the atonement" (John Watson).

Time Signals

International Service Still Functioning During The War

Alfred from war is an international service — time signals — affecting every home and office and equally important to learned scientist and untutored laborer.

Dominion observatory officials said daily international wireless time signals—one of them from Germany—are still being picked from the air to provide a scientific check on the clocks of Canada.

The signals are in conformity with international agreement and reports on their use are made to co-operating observatories. Ottawa receives daily time signals from Arlington, N.Y.; Greenwich, France; Moscow, U.S.S.R.; Copenhagen, Denmark; Rio de Janeiro, Brazil, and Rugby, England.

MICKIE SAYS

"MY BOSS SAYS, 'MY IDEA OF A GOOD MAN IS ONE WHO FEELS 'Y'KIN SEND THE PAPER TO A YEAR ORSO, WHEN HE IS HAPPY TO 'N' WHO WILL COME IN LATER N' PAY UP AND THANK YOU!'"

For Prisoners Of War

Canadian Red Cross Sends 15,000 Parcels Weekly To Europe

Dr. P. W. Routley, national commissioner of the Canadian Red Cross, Toronto, said his organization is sending 15,000 parcels a week to continental Europe for prisoners in enemy occupied territory. The parcels, he said, cost \$1.50 apiece to put up and transportation expenses are \$2.50 each. They contain a week's supply of food, giving 2,300 calories a day.

Small In Comparison

Canada's cheese contract with Great Britain calls for the shipment during the current production year of 50,000 long tons. This looks like a lot, but when it is compared with the 100,000 long tons which New Zealand has agreed to ship.

Records show that 90 per cent. of automobile owners have in the past bought new cars once every 22 to 30 months.

The chief sources of cork are Spain and Portugal.

QUESTION OF A BRITISH OFFENSIVE IS DEBATABLE

London.—The House of Commons will debate—probably in secret—whether Britain can continue to co-scrip her own manpower for an eventual continental offensive and still turn out its armaments which both she and her allies need, Prime Minister Churchill disclosed.

There are unconfirmed reports that the government will form no more all-British divisions on home soil. Some persons who are well-informed contend the limit already has been reached in pulling men from the vital fields of war industry, mining and agriculture to serve in the armed forces.

Mr. Churchill told the house the problem of distributing manpower is a "direct and central part of the war effort" and that the debate, therefore, probably would have been put aside had the information developed said the Germans.

Among the political developments was a meeting of the Conservative party which approved unanimously a vote of confidence in the Churchill government based on the cabinet's decision "to welcome the Russian nation as an ally in the struggle against aggressive barbarism, and to fortify their resistance by every possible means."

See Cuthbert Headlam, Conservative, in making the motion said: "We should be very foolish if we did not realize that at present our interests and those of Russia are identical."

In connection with the manpower problem, Mr. Churchill has disclosed that the question of invading the continent has been weighed seriously by the government.

Actually, a growing feeling that Britain is near the limit of her manpower resources, except that which comes from the Empire, has been responsible for a measurable dwindling of the public clamor for an immediate invasion of the continent in order to ease Germany's pressure on Russia.

There appears to be growing acceptance of the idea that a land offensive must be deferred one year, possibly two. Thus, instead of invasion talk, there is growing emphasis on the devotion of all efforts to providing arms and munitions for Russia's millions of men.

Must Join Forces

United States-British Union To Ensure Peace Urged By Knox

Indianapolis.—U.S. secretary of the navy, Frank Knox, proposed that the United States and Britain join forces "for 100 years at least," to produce "by force if need be" an effective system of international law.

He told the convention of the American Bar Association that to prevent another world war the seven seas must be controlled for many years to come by the great "peace-minded, justice-loving" powers of Britain and the United States—which are "lacking in any desire for selfish aggrandizement."

"To put it bluntly," he said, "we must join our force, our power, to that of Great Britain, another great peace-loving nation, to stop any aggression, which might lead to world disturbance, at its beginning."

The United States must give up the "fatuous folly" that it will not fight unless invaded.

There will not be for many years a time when we may not have to fight—"let us determine that we will fight elsewhere than on our own soil; far better a distant war than one at home."

Royal Air Force

Has Destroyed 658 German Fighter Planes Since February

Middlebrough, Eng.—Air Minister Sir Archibald Sinclair told a Middlebrough audience that since last Feb. 1 the Royal Air Force had destroyed 658 German fighter planes during offensive operations over enemy territory and had itself lost 428 planes and 374 pilots. The minister said R.A.F. sorties over northwest France were pinning down large forces of German fighters which otherwise would be thrown against Russia.

Guest Children Like Canada

Edmonton.—Nearly 50 per cent of the British guest children in Canada have decided they want to spend the rest of their lives in the Dominion. Mrs. T. M. Snow of Ottawa, only English representative on the children's overseas reception board, said in an interview here.

A Strong Base

Vast Supplies of Equipment And Materials At Iceland Reykjavik, Iceland.—A field force of the United States Army—infantry, artillery, and engineer, signal, ordnance and medical units—has arrived here with vast supplies of equipment and materials to make this one of the most formidable bases to the north.

The Americans brought with them commander, Maj.-Gen. Charles H. Roosevelt, called "some interesting equipment"—skis, snowshoes and Garand automatic rifles for every man. To take over camps built by U.S. marines and British forces. Maj.-Gen. H. O. Curtis, commander-in-chief of the British forces and general officer commanding the British troops on the islands, continues in command of all soldiers, including the American contingent.

(The arrival of American naval and marine forces in Iceland was announced Jan. 7 through American officers were seen there as early as mid-May. U.S. army air corps units also are on the islands. On Sept. 25, the arrival in Reykjavik of U.S. army nurses was disclosed.) British Tommies off duty soon were the best of terms with the Americans. These new troops appear to have supplies enough to ignore the weather.

The vast equipment should turn the bleak island into a Gibraltar of the north.

Indians More Prosperous

Good Fish Catch And Strong Fur Market Are Factors

Ottawa.—The 120,000 Indians of Canada, who have tasted the lean times of depression are enjoying a prosperity that is not shared by several years, Indian affairs department officials said.

Dr. H. W. McGill, director of the branch who has just returned from a western tour, said that among factors assisting the Indians' economic position was a good fish catch on the Pacific coast and the existing strong fur market with fair supplies of furs and animal products in territories where Indians hunt.

Information available to the branch indicated "several hundred" Indians have joined the fighting force, following in the footsteps of tribesmen who gave good service in the Canadian army during the First Great War.

Speeding The Mail

To Establish Airgraph System Between Canada And Britain

Ottawa.—Postmaster General Mulock says arrangements are underway to establish an airgraph system between Canada and Great Britain. The airgraph system is the scheme whereby the sender writes his message on a special form which is photographed on a miniature film. This is airmailed across to Britain where it is relayed and delivered. The plan is for communications between Canadian and troops overseas, and similar to the present scheme used between Britain and troops in the Near East. The rate would be 10 cents a word.

Praise For Workers

Lord Beaverbrook Pleased With Tank Production For Russia

London.—Lord Beaverbrook, minister of production, sent from Moscow a telegram of congratulation to all workers who took part in the "Tanks for Russia" week, which set a production record.

The message read: "Boys, oh boys, you've raised the roof and lifted the lid and beaten the band. Now let's show them we can do the same and better for a 'Tanks for Britain' week."

Large Order Placed

Canada Will Soon Produce Fighter Planes Equipped With Engines

Toronto.—Canada's first fighter plane to be equipped with an engine before being sent overseas will shortly be in production here. The plane, manufactured by the De Havilland Aircraft Co., will be powered by a Rolls-Royce engine manufactured at the company's Detroit plant.

The new plane will be known as the "Mosquito," and a large order has been given the company.

More New Cars

Ottawa.—In spite of new taxation and gasoline restrictions, sales of new motor vehicles in August increased 45 per cent in number compared with the same month last year, the Dominion bureau of statistics said.

RUSSIA TO HAVE ALL NECESSARY WAR SUPPLIES

Moscow.—Great Britain and the United States agreed to fill practically all Soviet needs for war supplies in exchange for Russian raw materials at the concluding session of a momentous three-power conference that ended two days ahead of schedule.

It was probably the shortest international council of such dimensions ever held, having lasted only three days. A joint statement issued by the British and American delegations and a Soviet communiqué told its results, in general terms.

For Great Britain and the United States Lord Beaverbrook, Britain's minister of supply, and W. Averell Harriman, President Roosevelt's envoy, promised.

"To place at the disposal of the Soviet government practically every requirement for which the Soviet Union requires large quantities of raw materials," said the statement.

In return, said the statement, "the Soviet government has supplied Great Britain and the United States with large quantities of raw materials urgently required in those countries."

Arrangements were made to "increase the volume of traffic in all directions," it added. "The joint Anglo-American statement declared that Premier Stalin 'expresses his thanks to the United States and Great Britain for their bountiful supplies of raw materials, machine tools and munitions of war' and acknowledged 'the ample supply of Russian raw materials from the Soviet government.'"

The statement ended: "In concluding its session the conference adheres to the resolution of United Nations that after the final annihilation of Nazi tyranny, a peace will be established which will enable the whole world to live in security in its own territory in conditions free from fear or need."

The Soviet communiqué stressed the "atmosphere of perfect mutual understanding, confidence and good will" and said the delegates were "inspired by the eminence of the cause of delivering other nations from the Nazi threat of enslavement."

Stalin, it said, "took an active part" in the conference which "manifested perfect unanimity and close co-operation of the three great powers in their common efforts to gain a victory over the mortal enemy of all freedom-loving nations."

The Russian communiqué did not specifically mention the agreement for exchange of weapons and raw materials.

Beggars on the streets of New York City make \$15,000,000 annually, according to estimates.

R.A.F. TRAINING OFFICIAL

Air Commodore A. C. Critchley, C.O.M. D.R.O., Canadian-born director of initial training for the Royal Air Force in England, arrived recently at Toronto on a tour of No. 1 Air Training Command.

peace will be established which will enable the whole world to live in security in its own territory in conditions free from fear or need."

The Soviet communiqué stressed the "atmosphere of perfect mutual understanding, confidence and good will" and said the delegates were "inspired by the eminence of the cause of delivering other nations from the Nazi threat of enslavement."

Stalin, it said, "took an active part" in the conference which "manifested perfect unanimity and close co-operation of the three great powers in their common efforts to gain a victory over the mortal enemy of all freedom-loving nations."

The Russian communiqué did not specifically mention the agreement for exchange of weapons and raw materials.

Beggars on the streets of New York City make \$15,000,000 annually, according to estimates.

IN BRITAIN, W.A.A.F.'S GUARD BALLOONS

One of the very out-of-the-way jobs now being done by the W.A.A.F. of Britain is guarding balloons, a heavy job since the balloon ropes have to be hauled manually and evenly to give perfect anchorage.

CANADIAN BROTHERS PROUD OF POTTING NAZI 'EGG-LAYER'

These boys are the envy of the rest of the Canadian troops in Britain. Through force of circumstances, most of the others haven't yet been in contact with the Nazis but the members of this anti-aircraft section in training in England have shot down a Nazi plane, and are very happy! These two are brothers E. A. Underwood (left) and L. H. Underwood who were landscape gardener and sawmill worker, respectively in Victoria, B.C., before they joined the army.

Munitions For Middle East

United States War Supplies Are Pouring Into Cairo

Cairo.—United States war supplies are pouring into the Middle East in such volume they are seriously straining unloading facilities of Egypt's ports.

Ships are bulging with planes, tanks, material and general merchandise, discharging their cargoes amid feverish activity day and night.

More than a score of American ships already have arrived in this area—lessened supplies.

These are in addition to British, Danish, Netherlands and other freighters coming in with troops and cargoes from Britain and all parts of the British Empire.

CUT OUTPUT OF ELECTRICAL GOODS BY ONE QUARTER

Ottawa.—Domestic production of radios, refrigerators, stoves, vacuum cleaners and electric washing machines has been reduced to 75 per cent of 1940 output, the department of munitions and supply announced. The curtailment order was issued by manufacturers by Alan H. Williamson, controller of supplies in the department, with approval of H. C. Berkinshaw, chairman of the war time industries control board.

The preliminary reduction to 75 per cent of 1940 output will result in the following estimated decreases in production, the department said: Radios, 123,000; electric washing machines, 25,000; electric refrigerators, 13,000; electric stoves, 7,700; gas stoves, 7,700; vacuum cleaners, 3,000.

The ordered reduction applies to all other types of stoves but officials said that no estimate of the decreases in other types is available.

The department described the ordered reduction as "a smashing blow at the production and sale of non-essential consumer goods in wartime." "While the order is aimed at conserving steel, metals and other materials urgently required for war purposes, it also curtails the trend toward increasing consumer purchasing in Canada which cannot be allowed to interfere with war production," the department's statement said.

The statement said Munitions Minister Howard said: "Whether or not there can be no guarantee that materials will be available for production of the regulated goods 'even on the lower (production) basis.'"

"The output of merchandise essential to our war effort must come first," Mr. Howe said.

The announcement that production would be curtailed was made after the heavy consumer goods affected had been declared "supplies" under provisions of the Munitions and Supply Act, thereby bringing them under jurisdiction of Supplies Controller Williamson.

At the same time Mr. Williamson had issued order cutting production to 75 per cent of 1940 output.

The departmental statement said Mr. Williamson plans to set up advisory committees in each of the industries affected.

"Thus the industries themselves will co-operate with the controller in the diversion of their output from civilian to war needs," it said.

MEASURES USED BY THE NAZIS TO PUT DOWN REVOLT

London.—Hangman and firing squad held sway in the writing new measures to suppress revolts in Czechoslovakia and acknowledged "internal front" of revolt that stretched from Prague to Poland.

In former Czechoslovakia, in the angry remnants of Yugoslavia, in Greece, in France, and even in Bulgaria and Hungary, the story was the same, differing only as to scope and detail.

Admitting employment of the sternest possible measures, German sources asserted:

"With Germany herself deep in a fight for life it is understandable that we cannot tolerate an internal front against us."

But Czech sources in London suggested the blood bath of old Czechoslovakia had a far more sinister meaning than mere suppression of revolt. They said it is a deliberate process of extermination of all intellectual Czech elements liable to offer opposition, preparatory to mass transfer of heavy German troops to comparatively bomb-free sectors behind the Sudeten mountains.

Some of the particulars of the unrest as trickles through the censorship files follow:

German execution squads shot more Czechs in both Prague and Brno, southern Czechoslovakia, on conviction by courts martial of high treason, murder, sabotage and illegal possession of weapons, and the courts themselves handed out 39 sentences of death.

D.N.R. news and propaganda agency, said those executed included Jews. "The Prague radio, quoted by Reuters, said that three Jews and Czechs have been shot. Three Jews hanged and 110 Czechs handed over to the Gestapo." Three accused Poles were also executed.

Total death sentences in the provinces since the German invasion were declared last Sunday how have reached 130 according to unofficial counts. The figures were said to be announced through the German news and propaganda agency said other sources.

Some of the Czechs faced firing squads; others were hanged, the foreign office commentary Dienst Deutsch said. Whether all the condemned have been executed was not stated.

May Evacuate Nationals

Essential to Life Left in Japan Mostly Missionaries

Ottawa.—The department of external affairs is now making reports of deterioration in Japanese-British relations, has just revealed that Canada may very shortly evacuate more nationals from Japan.

Canadians still in Japan are mostly missionaries of both Catholic and Protestant faith.

Officials of the department say they hope to repatriate all who can be persuaded to leave aboard a vessel which Britain is understood to have dispatched to Nippon.

But on the surface there is no indication of a deterioration of Japanese-Canadian relations. Tokyo apparently accepted the trade rupture with the Dominion when Japanese credits were frozen.

Regardless of Danger

London.—Seven hundred members of the Young Peoples Keep-Fit League petitioned the government to keep recreation centres open in the winter regardless of the danger of night air bombings. "If we must die in an air raid," the petition said, "we prefer to die happily at a dance rather than perish miserably in a dugout."

For Scrap Metal

London.—The historic metal fences and gates surrounding Buckingham Palace are to be taken down to be converted into scrap for the manufacture of tanks and other weapons. The ministry of works and buildings said the King had approved the removal of about 20 tons of metal as a contribution toward a national campaign.

Arrives In England

London.—Sir Lancelot Oliphant, former British ambassador to Belgium who was captured when the Germans overran that country in May, 1940, has arrived in England from Lisbon. He was one of several British officials who were taken to Germany by the Germans in the early stages of the invasion of Britain and German prisoners.

WAR SAVINGS CERTIFICATES ARE TOKENS OF VICTORY

War Savings campaign for the
Prairie Provinces opened October 15,
and it is hoped that citizens of Carbon
and district will respond in their usual
whole-hearted way. The importance of
purchasing War Savings Certificates
cannot be over-emphasized.

Today, Canada has better than one
hundred thousand crack shock troops
standing ready to repulse the Germans
if they should invade Britain. Canada's
mighty air force and her navy are
already engaged in active combat and
this action will increase as Britain
more definitely assumes the offensive.

These men can expect nothing but
blood, sweat and tears, but the Canadian
public, who are not in the front
line, must sacrifice, save and lend to
equip, feed and train the fighting
forces.

Soldiers must go into battle whenever
necessary and an alarm comes from
one battle in the skies only to
prepare for another and another.

We at home must support another
appeal and yet another appeal until
such pleas are no longer necessary.

The men who call on you to ask you
to hedge part of your earnings for the
purchase of war savings certificates
are patriotic men who are giving
their valuable time to service for
their country's cause. Give them
a cool reception and serve by saving.

This is a battle for your homes and
rights—Enlist Now.

HARVEST**

Dr. K. W. Neathy
Director, Agricultural Department
North-West Line Elevator Association
"Going Back"—1.

The belief that varieties of wheat
and other crops deteriorate or "go
back" is widespread. This belief is
probably quite old; indeed, it may
trace back to Charles Darwin's con-
clusion that "nature abhors self-
fertilization." Thus in the early years
of the present century the increased
efforts to cross-fertilize Red Fife and
Marquis by creating different strains
of the same variety. This resulted in
"regenerated" Red Fife, or "regener-
ated" Marquis; but there was never
a shadow of evidence that the re-
generated strains were any more pro-
ductive than the originals.

The "going back" idea may be
strengthened by the knowledge that
growers of hybrid corn must renew
their seed each year. However, the
situation with cross-fertilized crops,
such as wheat, is quite different from
that with crops mainly self-fertilized
such as wheat, oats and barley.

The fact that Thatcher wheat suf-
fered from leaf rust this year has led
many people to believe that its rust
resistance is weakening. This is em-
phatically not so. Leaf rust and stem
rust are caused by two quite differ-
ent fungi. Thatcher has always been
susceptible to leaf rust, and there is
nothing to suggest that it is less re-
sistant to stem rust than it was ten
years ago.

Deterioration in farm stocks of
wheat is due to volunteerism of other
varieties grown a year or more
earlier, to mechanical mixing in
machinery or granaries, to livestock
manure on or passing over fields,
and to occasional natural crossing
between many varieties.

The occurrence of spotblights in
wheat might be considered an ex-
ample of deterioration through
natural causes; but they appear to be
largely self-eliminating.

(It's by evolution!)

Snicklefrizt

A smart man is one who has never
let a woman pin anything on him since
he was a baby.

Junior: "Mamma, why hasn't papa
any hair?"

Mother: "Because he thinks so
much."

Junior: "Well, why have you got so
much, mamma?"

Mother: "Go away and do your les-
sons."

A Holstein breeder got himself a
new cow and started in to milk her
for the first time. He milked and milk-
ed until he got his pail brimming full.
Then he took a quick look at it, walked
around by the cow's head, and offered
the milk to her saying, "Here, dam
ye, drink it!"

The surprised hired man who was
watching said "Why did you do that?"

To which the dairyman replied, "It
looks so darn thin I thought I'd better
run it through again!"

Little Boy: "Can you give me any-
thing to relieve pain?"

Doctor: "Where is the pain?"

Little Boy: "It hasn't come yet, but
daddy is just reading my school re-
port."

A lady who lived near an army
camp called the captain and requested
that he send two soldiers to eat Sun-
day dinner with her. She requested
that he not send any Jews.

Sunday at twelve the doorbell rang
and she went down to find two black
Negroes at the door. She asked who
they were and they told her they were
the soldiers who were sent to eat din-
ner with her.

She said: "There must be some mis-
take!" The Negroes replied, "No'm,
Cap'n Rosenbloom nevah makes a
mistake!"

Life is just an everlasting struggle
to keep your coming in and teeth and
hair and vital organs from coming out.

FARMERS...AS IMPORTANT AS ARMOURERS

It may not appear so dramatic to operate a dairy farm, to grow grain
or raise bacon as to make planes and steel tanks, but the work of the
farmer is just as essential to victory as the work of the armament maker.

Always interested in the development of agriculture and practical co-
operation with farmers, the Bank of Montreal is especially desirous now
of assisting our growers of foodstuffs.

Farmers are cordially invited to talk confidentially with our nearest branch
manager respecting their credit needs.

RED CROSS SPECIAL

(By Garry Allighan)

It is officially announced there are nearly 50,000 persons here still undergoing medical treatment in London for injuries received in enemy air raids. That aftermath of blitzing, whose season reopened last week, is maintaining demands on the services and resources of the Canadian Red Cross at a consistent and persistent high level.

When such disaster drops into the calm, normal existence it is experience so violent that the work of repair is only for skilled medical and surgical experts. But there are exceptions.

Mrs. Hilda Hunter says it was Hitler who cured her incurable paralysis. She had been confined to bed at her home in south Wales for four years and was given up by nine doctors. When Swansea was bombed, a high explosive missile fell in her street, causing great destruction. It gave Mrs. Hunter such a shock she jumped out of bed and ran downstairs. Her husband thought he saw a ghost walking. Ten minutes later both were having tea at a mobile canteen sent to London by the Women's Canadian club.

That is a healing job for which the Red Cross cannot claim credit, but it can for hundreds of others. A few days ago Mrs. Sybil Austin, a young mother, was taken to a special clinic with her lower jaw badly injured when her home at Margate was bombed. Surgical skill from across the Atlantic wrote a new chapter in medical science there recently.

Steel pins were implanted on each side of the fracture inside her jaw, the two ends of the fracture being brought into position and held there by a clever contrivance of stainless steel bars with chromium fasteners. This new treatment, almost painless, will make it possible for Mrs. Austin to leave bed and undertake light household duties while the fracture is setting.

But there is a great deal of hasty surgery done by Red Cross nurses and doctors amid ruins and rubble sometimes while bombs still fall. Often there is no time for hospital operating rooms or careful examination. These Canadians, inheriting resource from their country and their forefathers, must diagnose in split seconds and operate with whatever instruments are along or what can be devised.

And over and over again they do it, marvellously snatching from death hundreds for whom onlookers held not the slightest hope.

PLAN AIRGRAPH SYSTEM TO SPEED LETTERS FOR OVERSEAS

With a view to speeding up the delivery of letters from relatives and friends in Canada to the Canadian Forces in the United Kingdom, Honourable William P. Mulock, K.C., M.P., Postmaster General, stated that arrangements are now under way for the institution of a time-and-space-conserving Airgraph Service between this country and the United Kingdom.

In keeping with his policy to do everything possible to facilitate the transmission of mails for our Forces, with the minimum of loss and delay, Hon. Mr. Mulock is planning to institute this special system at an early date. Following completion of arrangements now under way, a definite announcement will be made as to the date of commencement.

Under this special system the sender

of an Airgraph communication writes the message and address on a special form provided by the Post Office. The completed form is next photographed on miniature film which is dispatched by Air. On arrival in the United Kingdom photographic enlargements are made and delivered through the Army Postal Service to the troops in the usual way. The rate on an Airgraph message will be 10 cents.

"I have no faith in women."

"Why Not?"

"I put a matrimonial advertisement in the paper and one of the replies was from my fiancée."

Sven: "Ollie, it's not true about the Irish being such good fighters."

Ollie: "Why do you say that?"

Sven: "Well, last night my cousin and I and two other fellows nearly knocked an Irishman silly."
